

City of Santa Fe Transit Division
FY2021 Section 5310 Application
Program Coordination

As an operator of a fixed route transit system in an urbanized area, the City of Santa Fe Transit Division is required to operate a Paratransit Service for those not able to ride the fixed route system. Paratransit services are provided within the entire city limits and with $\frac{3}{4}$ mile of fixed routes that extend beyond the city limits.

The Transit Division is familiar with the majority of other service providers and reviews letters of intent from other section 5310 applicants, primarily from the non-profit sector, to ensure that service duplications are minimized and makes comment when it is determined that there is a duplication of services.
